

A simple, but effective login page

Nothing too fancy

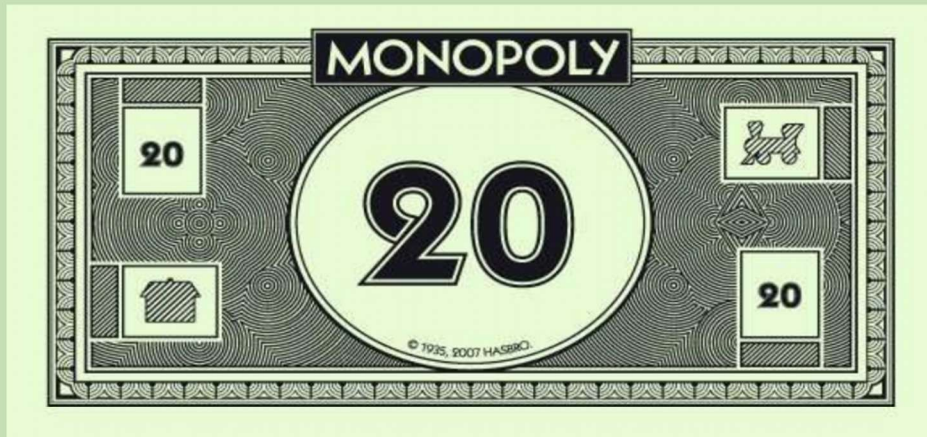

Home Page

Date.Now()

Last Update: 9/22/2019

Last Balance: \$ 504.13

Use the Menu button to select the page you wish to navigate to.

After the login you are sent to the Home page.

This page shows you the current date, last date you logged in and last reported balance.

The Menu button example is on the last page. You use it to navigate between pages.

Date.Now()

Total Budget View

This will be a standard calender select

Date Range: 9/20/2019 9/25/2019

Category:	Money Spent:	Percentage:	Budget goal:
Food	\$ 1,235.00	21%	15%
Rent/Mort	\$ 2,000.00	25%	20%
Car Payment	\$ 400.00	5%	5%
Utilities	\$ 500.00	7%	7%
Medical (Dad)	Ect...		
Medical (Mom)	Ect...		
Medical(S)	Ect...		
Medical(D)	Ect...		
Life Insurance			
Car Insurance			
Entertainment			
Clothes			
ect...			
ect...			
ect...			

This page shows the individual budget numbers determined by a specific date range

This will show you where your money is going, and help determine if you need to

Adjust your master budget.

[illegible]

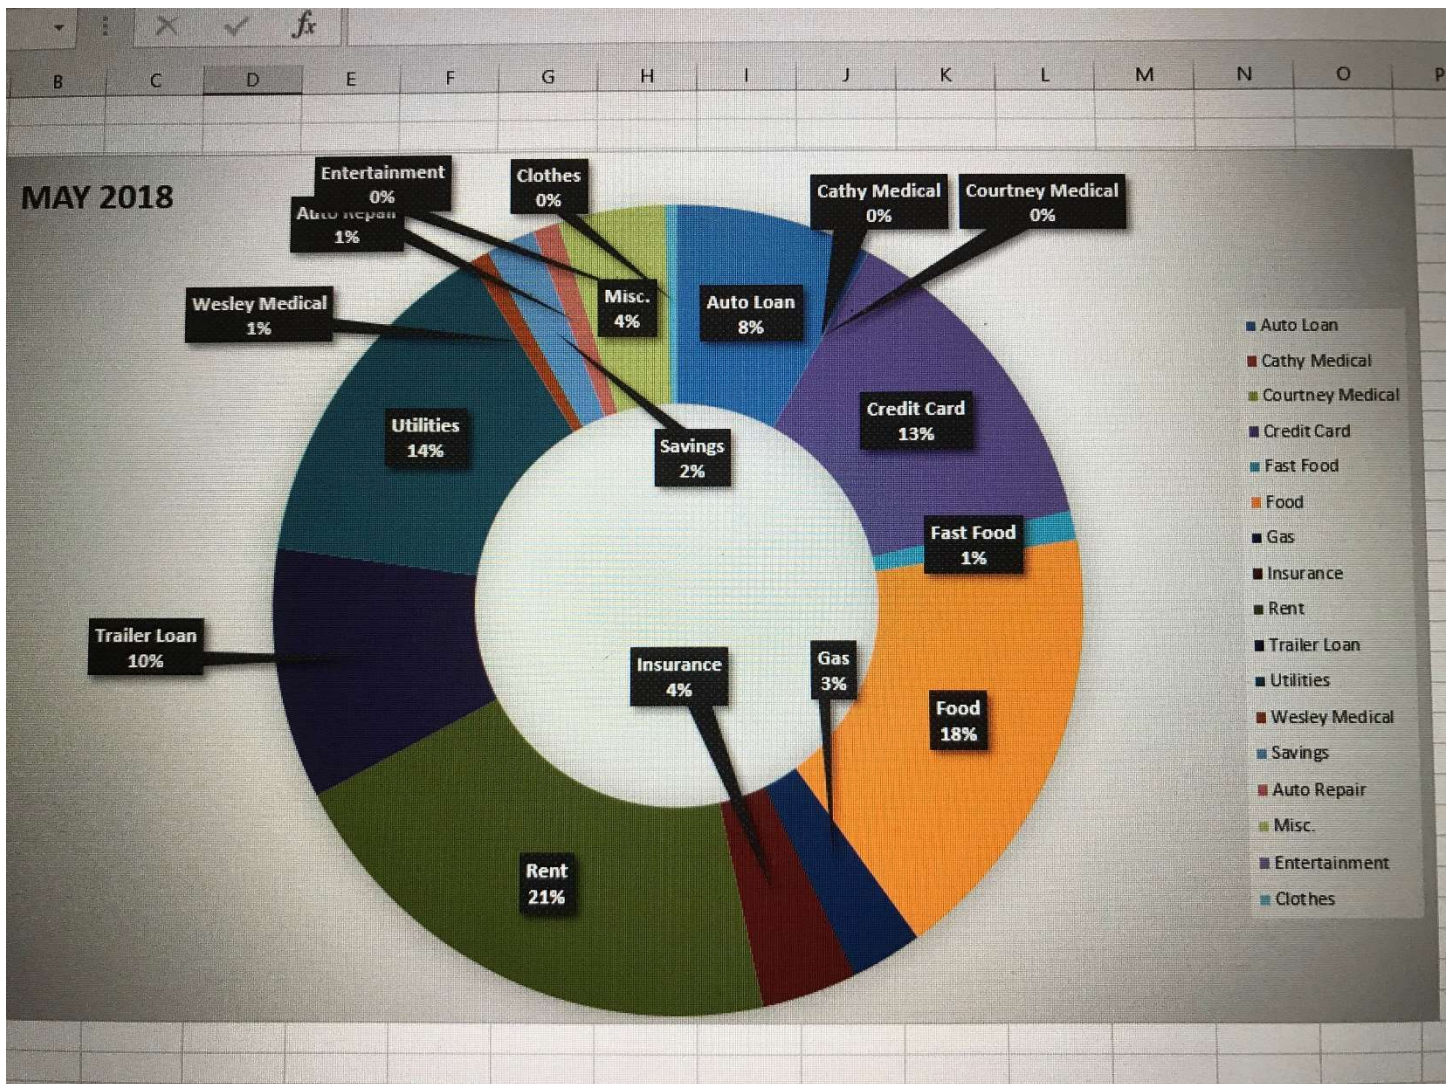

As I am typing this, I am thinking of adding an ability to change categories if the initial Selection was determined to be wrong...

Date.Now()

Master Budget Adjust

Category:	Existing Goal:	New Goal:
Food	21%	15%
Rent/Mort	25%	20%
Car Payment	5%	5%
Utilities	7%	7%
Medical (Dad)		
Medical (Mom)		
Medical(S)		
Medical(D)		
Life Insurance		
Car Insurance		
Entertainment		
Clothes		
ect...		
ect...		
ect...		

This is the page that will be used to adjust your budget goals. If it is determined that you need to plan on spending more in a category, this is where you will make that change.

I intend to figure out how to create this in the final product. I do not know if I will be able
To figure this out before the end of class, but this is being built for my personal use, so I will have this.

Date.Now()

**** All pages will have the menu button with the options listed ****

I forgot to add them to the other views...

Menu

Home

Data View

Category View

Download .csv

Save Data

Quit Application

Finally, this is the one item I forgot to add to all the pages before (Except the login)

The Menu button will drop down to display all of the pages you can directly navigate to.
